Class & Race Features

Druid (L3)

- **Druidic language** (secret language, flavor only in combat)
- **Spellcasting (WIS):** Spell save DC **13**, spell attack +5. Prepares WIS + Level = **6 spells daily** from the full druid list. Slots: **4× L1, 2× L2**.
- **Wild Shape (L2):** Action or **bonus action (Moon Druid)** — transform into a beast. **2 uses per short rest**. Duration = half druid level in hours (1 hr at L3) or until reduced to 0 HP.
- **Circle of the Moon (L2+):**
 - **Combat Wild Shape:** Transform as a **BONUS action** (not full action). Spend a spell slot to heal 1d8 per slot level while in beast form.
 - **Circle Forms:** At L3, Moon druids can Wild Shape into beasts up to **Challenge Rating 1** (double the normal CR ½ cap for other druids).

Wood Elf

- **Darkvision 60 ft**
- **Fey Ancestry:** Advantage on saves vs. Charmed; immune to magical sleep (banned anyway).
- **Fleet of Foot:** Base speed **35 ft**.
- **Mask of the Wild:** Can attempt to **Hide when lightly obscured** by natural terrain (foliage, rain, mist, falling snow, etc.). Varies by map — strong on forested / weather maps.
- **Trance:** Long rest in 4 hours (flavor).

Signature Tactical Moves

1. **Turn-1 Brown Bear.** Bonus action: **Combat Wild Shape** → **Brown Bear**. Gain a fresh 34 HP pool, claws + bite Multiattack, 40 ft speed. Action Round 1: **Multiattack** = claws (2d6+4 = avg 11) + bite (1d8+4 = avg 8.5). **~19 avg damage on Round 1 from bear form — the highest sustained martial DPR in the roster without a feat.** AC 11 is low, but they're burning through 34 HP before they hit your druid's 32. Two-bar tank.
2. **Dire Wolf Kite-Lock.** Alternative Wild Shape (CR 1): **Dire Wolf** — HP 37, AC 14, bite 2d6+3 with **STR save DC 11** → **knocked prone** on hit. Prone enemies: attacks within 5 ft have advantage, ranged attacks vs them have disadvantage. Combos hard with your Rogue's Sneak Attack (advantage from prone) and eats ranged enemies' initiative with disadvantage. Speed 50 ft = better kiter than bear.
3. **Moonbeam Trap (L2 slot, caster form).** Out of Wild Shape or deliberately casting? Drop a **5-ft radius column of moonlight** at a chokepoint. Creatures that enter or start their turn inside: **CON save DC 13, 2d10 radiant on fail (half on save).** On your subsequent turns, **move the beam 60 ft as an action.** Sustained zone-denial — forces enemies out of cover or eats their HP every round. Concentration.

Town Phase Notes

- **Perception +5 + Survival +5 + Nature +2** — best “find the Catacombs” character in the roster. Pair with him on the Scouting station.
- **Animal Handling +5** — if any town station involves stable-hands, courier-beasts, or a Neutral Titan intro check, he’s the pick.
- **Goodberry** in the prep phase = **10 HP of emergency snacks** that don’t consume spell slots at match time (cast during town, eat during combat). Strong budget-free healing.
- Zero CHA → bad at Hagglng and Persuasion. Let the Bard or Paladin handle those.
