Spell Slots & Known Spells

Slots: 2× L2 slots (Pact Magic — always cast at highest tier, recover on short rest) **Spells Known:** 4 (all L1 or L2)

Cantrips Known (2 base + 3 from Pact of the Tome = 5 total):

Base Warlock cantrips:

- **Eldritch Blast** (1d10 force, 120 ft ranged spell attack) — **1 ray at L3**, primary damage cantrip. **Agonizing Blast adds CHA (+3)** and **Repelling Blast pushes 10 ft** on hit.
- **Chill Touch** (1d8 necrotic, 120 ft ranged spell attack, target can't regain HP, undead get disadvantage on next attack) — niche anti-healing tool, mostly situational in v1.

Book of Shadows cantrips (Pact of the Tome — pulled from ANY class list, cast as warlock cantrips):

- **Guidance** (cleric, concentration, +1d4 on ability check within 1 min) — town-phase asset; combat irrelevant
- **Mage Hand** (wizard, 30 ft telekinesis, utility)
- **Minor Illusion** (bard/sorcerer/wizard, sound or image, 1 min) — positioning fakeouts in combat

L1 Spells Known:

1. **Hex** (*concentration, bonus action, 1 hour*) — Choose a target within 90 ft. Deal **+1d6 necrotic** damage every time you hit it with an attack. Target has disadvantage on one ability check of your choice. **If target drops to 0 HP, move Hex to a new target as a bonus action.** Core spell for this character — stays up the entire fight.
2. **Hellish Rebuke** (*L1, reaction, when you take damage*) — 2d10 fire, DEX save DC 13 half. Useful backup; but the Tiefling racial version at L2 is stronger — save the spell slot for Scorching Ray.

L2 Spells Known:

3. **Scorching Ray** (*L2, Fiend expanded list*) — Action, 3 ranged spell attacks, each 2d6 fire (avg 21 if all hit). **With Hex up, each ray adds +1d6 necrotic on hit → avg 31 damage if all rays land.** Flagship nova.
4. **Misty Step** (*L2, bonus action*) — Teleport 30 ft. Positioning / escape / engage. Burns a precious L2 slot but saves your life — and both slots come back on a short rest.

Note — **Sleep is banned by the variant** and isn't on the Warlock list anyway.

Eldritch Invocations (2 chosen at L3)

- **Agonizing Blast** (requires Eldritch Blast) — Add **CHA modifier (+3)** to each **Eldritch Blast ray's damage**. Turns EB from 1d10 (5.5) into 1d10+3 (avg 8.5) per ray. **Core Warlock invocation — auto-pick.**
- **Repelling Blast** (requires Eldritch Blast) — On a hit with Eldritch Blast, **push the target 10 ft** in a straight line away from you. Combos with cliff / edge / hazard maps and breaks enemies out of melee range on allies.

The Fiend Features (L1)

- **Expanded Spell List** (always available to learn when you gain a warlock level):
 - L1: Burning Hands, Command
 - L2: Blindness/Deafness, Scorching Ray
 - (L3/L4/L5 tiers exist but unreachable at L3)
- **Dark One's Blessing:** When you reduce a hostile creature to 0 HP, you gain **CHA mod + warlock level = 6 temp HP**. Stacks on top of current HP; doesn't persist between combats. **Engine of sustain** — if he lands any KO, he's effectively healed back to 40 HP for the rest of the fight.

Tiefling Features

- **Darkvision 60 ft**
- **Hellish Resistance:** Resistance to fire damage. Laughs off enemy Fire Bolts, Scorching Rays, Burning Hands, breath weapons.
- **Infernal Legacy:**
 - **Thaumaturgy** cantrip (flavor — voice amplification, minor illusions)
 - **Hellish Rebuke** 1/long rest, cast as **L2 (3d10 fire, avg 16.5)** — **uses no slot**, reaction when you take damage. **Major** — it's a free 16-damage punish on any attacker, once per match.

Signature Tactical Moves

1. **Hex + Scorching Ray Nova.** Round 1 bonus action: **Hex** on priority target (L1 slot — wait, Warlock slots are L2-only, so Hex consumes an L2 slot if cast. **Exception:** Warlocks can cast known spells at any spell slot level — spell level, so Hex costs an L2 slot here). **Actually — Hex costs an L2 slot for Warlock at L3.** Accept it: the math still wins. Round 2 action: **Scorching Ray (L2 slot)** — $3 \text{ rays} \times (2d6 \text{ fire} + 1d6 \text{ Hex necrotic}) = \text{avg } 31 \text{ damage single-target}$. Round 3: continue with Eldritch Blast + Hex riders; move Hex if the target drops. **This is his match-defining sequence** and burns both slots.
 - *Alt opener to preserve a slot:* skip Hex on turn 1, raw Scorching Ray on turn 2 (avg 21), save the second slot for emergency Misty Step.
2. **Eldritch Blast Turret Turn.** When slots are gone — and even when they're not — spam Eldritch Blast. **1 ray at +5 to hit, $1d10 + 3 \text{ CHA}$ (Agonizing) = avg 8.5 force damage, push 10 ft on hit (Repelling).** Ranges out to 120 ft. If Hex is up, add +1d6 (avg 3.5) → **12 avg per EB ray with Hex on the target.** Can be used to knock enemies off ledges, out of the Druid's Moonbeam, into the Wizard's Burning Hands cone, or just out of melee range of an ally. **Positioning damage — rare in the roster.**
3. **Hellish Rebuke Reaction (Racial, 1/LR).** When hit by any attack: Reaction → **Hellish Rebuke** at L2 (racial, free — no spell slot). **$3d10$ fire, DEX save DC 13, half on save = avg 16.5 damage to the attacker.** Punishes the first big melee hit of the match — paired with his 14 AC, he's baiting enemies into triggering this. **Once per match** — use it on the biggest hit.

Town Phase Notes

- **CHA 17 + Deception + Intimidation + Persuasion** — **best social character in the roster**, full stop. All three CHA skills on one sheet. Dominates Casino, Haggling, Hag's Riddles (social angles), any NPC negotiation.
- **Book of Shadows with Guidance** — adds +1d4 to any party ability check during town phase. Generic buff for whoever's rolling (Investigation at Library, Athletics at Training Grounds, etc.). Concentration, 1 min — practically unlimited in town since nothing else is breaking it.
- **Arcana +2** — light Library contribution.
- Weak at physical Training Grounds (STR 8) and Perception-gated Catacomb searches (no Perception prof).
